

SOTI MOBICONTROL

PROVEN MOBILITY MANAGEMENT

Business mobility is complicated, and becoming more so. In just a few years, we can expect to see billions of new, connected devices, 'things' and IoT endpoints. Market-leading companies are embracing this new technology to help reinvent their business. SOTI MobiControl delivers management and security for these new mobile devices, sensors and endpoints, as well as their applications and backend systems. It takes mobility to endless possibilities, and frees your workforce to transform your business.

MOBILITY MANAGEMENT MADE EASY

SOTI MobiControl is an enterprise mobility management solution that secures and manages Google Android™, Apple® iOS, Linux®, macOS and Microsoft Windows® devices, throughout their entire lifecycle, from deployment to retirement. It controls all aspects of business mobility, from tracking physical assets, managing applications and content, as well as keeping devices and data safe and secure. SOTI is the proven leader for managing rugged, special-purpose devices used in key industries, such as: healthcare, transportation, logistics, retail and field services. It removes the complexity from managing a multi-OS, multi-vendor and multi-purpose business mobility program.

What SOTI MobiControl can do for your business

Manage your business-critical mobility

SOTI MobiControl includes productivity tools and remote support features that reduce device downtime and keeps your workers focused on their work.

- Remote support features (remote view/remote control, file sync, and 2-way chat) fix device and application problems quickly.
- HTML-based kiosk mode restricts a mobile device to a single application or suite of applications, and keeps the device secure, corporate data private, and workers productive.
- Automatically configure device connectivity (3G/4G, WiFi and VPN) to ensure the user is always able to communicate securely from any location.
- Polygon-based geofence deploys policies, apps, and content based on precise virtual boundaries of any shape (e.g., a school campus, company office, military base).

Manage your mobile content and applications

SOTI MobiControl provides enterprises with a complete suite of mobile content and application management tools.

- SOTI Hub is a secure content management application that makes it easy for businesses to control and manage important files and documents.
- SOTI Surf is a secure mobile browser with configurable features and security settings that support each company's unique business needs and end user requirements.
- Over-the-air installation, configuration, updates, and removal of apps from your enterprise or public app store.

Get your devices deployed quickly and correctly

SOTI MobiControl gets mobile devices into the hands of your workers faster, and makes sure they are set up per company mobility policies.

- Express enrollment via barcode scanning or NFC 'Bump' with SOTI Stage.
- Integration with device OEM rapid enrollment solutions, such as Apple DEP, Android zero-touch enrollment, Samsung KME, Windows Autopilot and Zebra StageNow.
- Provision devices quickly and consistently using profiles (configuration sets) and packages (application sets) based on user role or geographic location.
- Self-service portal allows employee-initiated enrollment.
