

TranASAP™
by BCC Distribution, Inc.

The Mobile RF Barcode Scanning & Data Collection Software Solution Designed to Optimize Inventory and Warehouse Management for SAP ERP Applications

TranASAP, by BCC Distribution, is a SAP-certified and pre-configured software product for inventory control that mobilizes and automates SAP software transactions for RF scanning and real-time data collection. The TranASAP software solution combines BCCD's optimized software transactions and RF/barcode equipment, with SAP S/4HANA or SAP ECC 6.0 ERP software and inventory control best practices.

TranASAP is a menu driven, role-based software product with a library of over 300 optimized SAP software transactions for SAP IM, WM and EWM built on inventory and warehouse management standards. TranASAP has been designed for multiple native SAP software platforms including SAP Console, SAP ITSmobile, and SAP Fiori design for real-time, direct connectivity for both SAP S/4HANA and SAP ECC environments. For applications with network connectivity limitations, TranASAP's version Store & Forward enables real-time connectivity with support for off-line (batch mode) functionality, eliminating concerns with RF connectivity.

BCCD's Barcode Solution Principles for Proven Success

- ✓ Ease of Use: Minimizing the number of screens, words, and user interaction.
- ✓ Simple to modify and maintain SAP RF transactions and screens.
- ✓ Direct connectivity and real-time integration.
- ✓ Return On Investment (ROI).
- ✓ Quick to install.

Examples of TranASAP Process Transactions for IM/WM/EWM Business Applications

Visit our website or contact BCC Distribution for our complete library of TranASAP/QuickPrint software transactions.

- **Goods Receipt** to PO / STO / Delivery w/ Label Print
- **Putaway** (Directed or Non-Directed)
- **Inventory Move** (SLoc, Bin, Plant, QA, and more)
- Batch, LOT, Serial Number, Tracking
- **Pick & Pack for Delivery**, LOAD, w/ Label Print
- **Cycle Count** and Physical Inventory
- **Production MFG**, Kanban, & Labor Tracking
- **Stock Overview** / Inquiries (by Location or Material)
- **Goods Issue** (to Cost Center, Work Order, Project)
- **HU's / SU's**, Catch Weights, & Pallet Labeling (LPN)

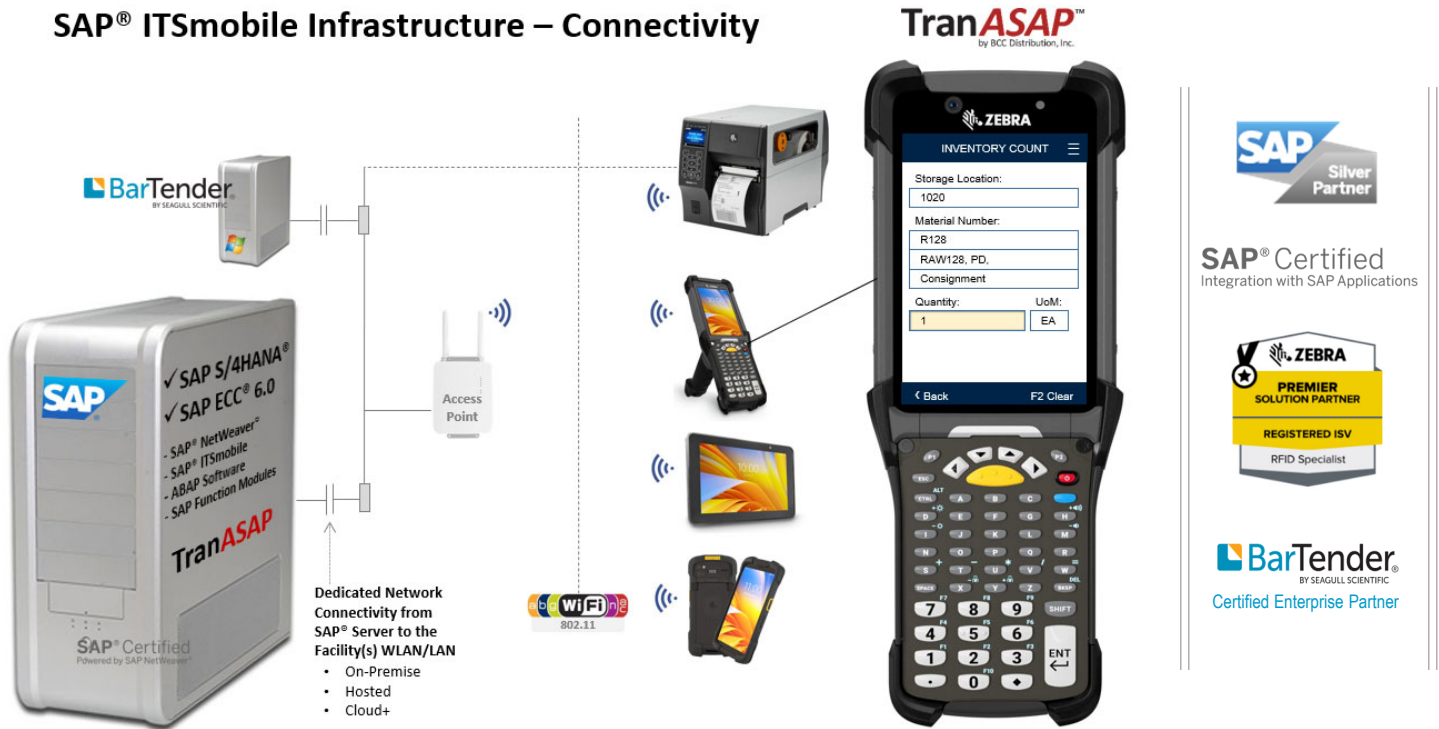

Benefits of TranASAP

- SAP-certified, powered by SAP NetWeaver.
- Immediate Return on Investment (ROI).
- Less screens, automated/combined transactions, intuitive use.
- Specifically designed to display fewer words and less data entry fields.
- Quick and easy customization of transactions (one data source).
- Rapid implementation, to include system testing, training, and support.
- Each transaction is optimized for barcode scanning and to minimize keyboard entry.
- Real-time validation at each data entry field, reducing errors and increasing accuracy.
- Scalable: by transaction or site deployment. System grows with a company's needs.

Start with as few as one SAP IM/WM transaction, one RF scanner, and one printer.

SAP® ITsmobile Infrastructure – Connectivity

With over 25 years of experience, BCC Distribution takes time to understand your business and process improvement objectives. We work alongside our customers to design and deliver a detailed blueprint as the starting point of our end-to-end, mobile RF scanning, data collection and barcode label printing solutions that work for your business today and are sustainable for tomorrow.
